

EcoC²S: What is Orgonite & How does Orgonite Work?

“What is Orgonite?”

“Orgonite is the continuation of [Dr. Wilhelm] Reich’s research and discoveries. The step from the Orgone Accumulator to the Orgone Generator, or Orgonite, was made among others by Don Croft. It was the combination of organic and anorganic material in a chaotic matrix, instead of a 2-dimensional layering as in Reich’s Orgone Accumulators, as well as the addition of Quartz crystals to amplify the energy output, that made all the difference in creating a device that would revitalize the stagnant (DOR) energy and turn it into lively, vibrant Orgone Energy.

“All of our Orgonite devices are made according to this principle: We combine resin (organic compound) with metal filings (anorganic compound), add quartz crystals, and voilà! — A piece of basic Orgonite, which we can now add other gemstones, healing herbs and metals to.”

...

“How does Orgonite work?”

“While Reich’s Orgone Accumulators worked to attract and concentrate Orgone and DOR, you can think of Orgonite as multiple Accumulators working in all directions — the Orgone energy is attracted and, through the chaotic matrix, it is converted into a spiraling energy flow.

“Essentially, interferences such as EMF (electromagnetic frequencies such as your cellphone emits) and other energetic manipulations are all forms of DOR — they cause stagnation and degeneration of your energetic field. Thus, Orgonite helps to revitalize your bioenergetic field simply by wearing it on your skin or having it near you. Various added gemstones will amplify protective, supportive or energizing effects of an Orgonite device.”
